flood of water that ran through its sides and in-

TYPICAL SCENE AT MISHICOT — Water continued to rise at a fast pace throughout sections of the Village of Mishicot Monday afternoon as the banks of the East Twin River could no longer curtail the rapid water flow into the river. Access to the village was nearly impossible for motorists traveling northwest from Two Rivers. Drivers had to circle the village to continue on their journey because huge sections of the highway were completely impassable. This scene was taken when entering the village from the northwest near the East Twin. Notice the height of the water on the garbage can at left corner of house in foreground. (Photos by staff photographer).

MANY HOMES VACATED—At least four families had to be exacuated by boat during the flood which struck the Village of Mishicot Monday afternoon. The water rose to such heights in spots that small buildings were erupted and carried down the East Twin River. This home stands near the shore of the river and was one of the first to feel the sting of the flood. Thr out the village homes were surrounded b ter which was continuing to rise as the sn ice kept melting. Basements in many downtown homes and business places w flooded.
